

MyCena Desk Center Solution

Credentials Management For Contained Workplaces

Who should use MyCena Desk Center?

- Organisations whose credentials and data should not be accessible from outside the contained workplace like **contact centers, call centers and BPOs**
- Organisations whose employees handle very sensitive information handled (Personal Identifiable Information, financial information, intellectual property...) due to high risks/consequences of frauds/leaks
- Organisations whose employees need to access to multiple systems, networks, applications, accounts and databases for one or multiple clients

CONVENIENT

Credentials always accessible within contained environment

SECURE

No password to create, type or memorize. No central identity.

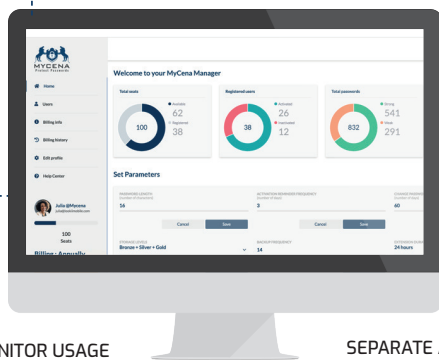

PRIVATE

Only user can access own fortress in contained environment using combination of PIN, lock pattern and passphrase
