

Introduction

Congratulations on choosing MyCena Business Fortress (MBF), a unique solution to manage and secure all your credentials without remembering any passwords.

MBF comes in two parts:

- a management console helps to distribute strong password rules and policies for every system, network, application, database, device... to all users.
- a mobile application

This is the user guide for MBF mobile application.

- CONVENIENT: Credentials always accessible - no internet required
- SECURE: No password to create, type or memorize
- PRIVATE: Only user can access own fortress using combination of fingerprint, facelD, PIN, lock pattern and passphrase
